

Antigen Testing Partnership Responsibilities

California is committed to making testing easy and is partnering with organizations across the state to provide COVID-19 antigen with confirmatory testing. **Please review the responsibilities** your organization will be committing to prior to applying for the program.

Note this a **not-for-profit** program. Your organization **may not** charge individuals or bill their insurance for antigen tests, confirmatory tests, or testing services. Your organization **will not** be reimbursed for staffing, PPE, or biohazardous waste disposal.

On-Site Set Up

- Designate a space in which you can register participants and conduct testing
- Procure PPE (i.e., gloves and masks required; face shields recommended)

Training

- **Minimum of 2 people trained for every 50 tests performed per week** per testing site location
- **2 hours** of training per person
 - Live Zoom training on conducting antigen tests
 - Live or asynchronous training of Primary Health (IT reporting platform)
- Report training completion to CDPH
- Keep an on-site record of training completion

You must submit training records before CDPH approves your organization to start testing.

Ongoing Quality Control Tests

- Conduct and report quality control tests for each lot number upon receipt of tests
- Keep an on-site record of quality controls

You must submit quality control records before CDPH approves your organization to start testing.

Testing and Reporting

- Dedicate approximately **5 person hours** for each **50 tests performed**
- Have **consistent Wi-Fi** and a **Wi-Fi enabled device with a camera and QR code ability** (e.g., tablet, laptop, or smartphone)
- Report **all** patient results into Primary Health **within 8 hours** of testing
 - Failure to report all tests will lead to non-compliance and termination from the program
- Dispose of positive or uncertain patient tests as biohazardous waste following city or county guidelines
